

PILGRIM PARK NEWS

TREE DONATIONS

At the 2014 Fall Association Meetings, we announced the start of our fundraiser to purchase trees to replace the dead/dying ones around the site. We are pleased to announce that we have received enough donations to plant 14 - 8ft native saplings. A special thanks goes out to all those who donated. It is not too late to contribute to our drive. There are still many trees around site that need to come down and it would be great to plant a new tree to replace each one. Thanks for helping us keeping our Site Beautiful!

SYRUP SEASON

Again this year, we tapped our mature Sugar Maples at Pilgrim Park. Our goal was to collect enough sap that we would end up with over 200 pints of syrup. Mother Nature did not agree. With the freezing temperatures lasting so long, we were able to produce just under 100 pints. But, we are not discouraged. This year, all syrup sales are being designated for **Summer Camp Scholarships**. If we sell our entire stock, we will be able to scholarship the Outdoor Ministries portion of 16 camper's tuition.
